

ADA Committee Minutes 12/19/2023

Attendees: Marty Roberts, Pricilla Fox, Chris Lumbra.

Montpelier ADA Coordinator Chris Lumbra gave the following update to those present:

The City Hall elevator modernization project has been paused due to flood damage to the building and the need to elevate or floodproof building utilities. RFP for repair/resiliency design has been awarded and initial report and design are expected in March of 2024.

Building redesign may also provide opportunities to correct other building issues identified in the ADA Transition Plan.

We have contacted the New England ADA Center and were advised that City Council meetings can resume in City Hall Chambers with the provision of reasonable accommodations. The ADA Committee confirmed that this was acceptable.

Next meeting date is 3/12/2024 at 10:00am
